

RESIDENTIAL GARAGE DOOR *Opener Accessories*

OHD Anywhere®

This controller allows you to remotely monitor and control your sectional garage door from almost anywhere with your smart device*. OHD Anywhere® is compatible with most iOS and Android mobile devices and with most residential garage door openers (see website for complete list).

Features include:

- Ability to monitor the door position (open or closed) and any change to the position
- Allows multiple user accounts to give others virtual access to your garage door
- Ability to know if an authorized user is operating the door with the OHD Anywhere® app
- Time-based features allow you to schedule door operation
- Maintains access history report for each opener
- Controls up to three doors (one module and sensor come standard with kit; sensors for additional doors sold separately - part number 39395R)

3-button remote

This remote with auto-seek dual frequency (315/390 MHz) allows you to operate up to three openers. It comes with a visor clip and can be used with a key ring. Backward compatible with all CodeDodger® equipped Overhead Door® openers.

Multi-function wall console

Featuring large push buttons for easy operation, this wall console also has our Sure-Lock™ button to disable the remotes and keypad for extra security at night or while away from home.

Digital wireless keypad

The wireless keypad provides convenient and secure garage access without the need for a remote or key. This is an ideal secure access solution for kids returning from school, when working on exterior home projects or when going out for a jog. Controls up to three CodeDodger® equipped garage door openers. Also uses auto-seek dual frequency (315/390 MHz).
