Door Construction

THERMACORE® MODEL 5740

Features premium insulation construction and design which provides maximum thermal efficiency and reduced air infiltration for your garage space. This durable line of garage doors gives you many years of reliable operation while providing comfort and beauty to your home, even in extreme climates.

Thermacore® Construction

Foamed-in-place, CFC-free polyurethane insulation sandwiched between two layers of corrosion-resistant steel helps control costly heat loss and gain. Thermacore® Model 5740 has a U-factor* of 0.15 and an R-value** of 12.76.

Thermal Seals

Innovative in-between section thermal seals provide an air infiltration rating as low as .08 cfm and help to provide superior resistance to the elements.

Bottom Weatherseal

This bulb-type weatherseal guards against wind and rain while providing a cushion when closing.

Durable Finish

Interior-side hot-dipped galvanized steel backing, with two coats of baked-on polyester paint, provides strength and a finished, clean appearance.

The Genuine. The Original

Since 1921, Overhead Door Corporation has not only raised the standards of excellence for the industry – we’ve created them. We created the first sectional garage door in 1921 and the first electric garage door opener in 1926.

Today, our network of over 400 Overhead Door™ Distributors are still leading the way with innovative solutions and unmatched installation, service and support. So look for the Red Ribbon. It’s your guarantee that you’re getting the genuine, the original Overhead Door™ products and services.

Thermacore® Model 5740, Flush Panel, Carbon Oak Plank Finish, Vertical Clear Long windows
